

## **Presentation – UAE Economy Script.**

**John – What a pleasant morning it is today!**

**Hassan – Yes indeed!**

**Aarush – Do you want to know something about this marvelous country?**

**John – Well of course.**

**Aarush – Once an unknown desert land, the UAE has come a long way to become an oasis booming with life. Of course, this came to be under the strong leadership of its founder Sheikh Zayed bin Sultan Al Nahyan, who was armed with foresight and a vision to establish a prosperous nation with values of morality, kindness, and peace.**

**Hassan – But, How did it grow to what it is right now?**

**John – The growth of a country depends on the economy, Let's learn more about the UAE's Economy.**

**Hassan – John, I noticed you said the word GDP, What does that mean?**

**Aarush–Gross domestic product is the market value of all the finished goods and services produced within a country, at a specific time.**

**Hassan – So we all must know that UAE is known for its petroleum industry, But there are still other industries that help in developing the UAE's economy. Some of those are, Petroleum, Fishing, Aluminium, Cement, fertilizers, Ship Repair, Construction, Materials, Handicrafts, Textiles, and Tourism.**

**Aarush – The rulers of the UAE haven't stopped there, They have planned the future of the UAE as well.**

**John–The prime minister of UAE and Ruler of Dubai launched 'UAE Centennial 2071' in 2017 as a pathway to make the UAE the best country in the world. Steadily increasing investments in artificial intelligence, biotechnology, nanotechnology, cognitive(cog-native) sciences, and multi-dimensional cumulative(cumu-lative) manufacturing continue to strengthen the UAE's position as a global leader in various sectors**

**Hassan–well john, education is the national priority for the Uae  
Education is the national priority–The UAE sets a huge part of its budget to develop the education sector. In 2018, the education sector received ARAB EMARTIES DIRHAM (AED)10.4 billion from the federal budget.**

**Aarush – Let's see some of the domains of the education plan.  
Pursuing Science in UAE can shape your future. As the country increases its influence in science-related sectors, several opportunities will be available for work. The UAE government is working to improve innovative satellite technologies. They are investing in the future and will require talented individuals to work for them.**

**John – What about Artificial Intelligence?**

**You can be an AI, Machine Learning Developer, or Data Scientist if you carve for a high-end technical job. Or you can be a computer vision engineer, robotics engineer, or Business analyst depending upon your interests in the field. There is a great scope in the telecom and cyber security sectors if you master AI skills.**

**Hassan – Nanotech in the UAE.**

**Demand for nanotechnology engineering technicians is expected to go up, with an expected 6,520 new jobs filled by 2029. This represents an annual increase of 1.15 % over the next few years.**

**Aarush – Biotechnology in the UAE and its future.**

**Now you may ask “What is biotech?”. Biotech is the use of biological processes for industrial and other purposes. According to Grandview Research, the biotechnology field will grow up to 13.9 percent. The sustainability and pharmaceutical markets will also grow between 2022 –2023. As the market of these fields grows, more talent will be needed.**

**Hassan – We are proud to say that our school “Dunes” is already on track to achieve Abu Dhabi’s economical agenda of 2030 & UAE’s Centennial 2071.**
